Stage 1: Idea

Submit Your Work

Submit your project idea, team information, problem statement, and proposed solution.

1 **Stage 1 — Idea** current stage

PROJECT OVERVIEW

ACP-267: Primary Network validator uptime requirement increases from **80%** to **90%**. Read the proposal

One-sentence description *

Summarize your project in one sentence (max 280 characters).

e.g. A decentralized lending protocol that lets users borrow against their NFTs without selling them.

Project Category

Select the category that best describes your project. This determines which evaluation questions you'll answer.

DeFi | Gaming | NFT / Digital Assets | Infrastructure | Social | DAO / Governance | Identity | Other

Is this an existing project?

Did you start working on this idea before Build Games?

No — new idea | Yes — existing project

!! PROBLEM IDENTIFICATION

What problem are you addressing? *

Describe the pain point or need your project aims to solve.

Describe the core problem, its scope, and why it matters...

Who experiences this problem?

Describe your primary user persona. What needs do they have? Is it B2B or B2C?

Who is your target user? What are their goals, frustrations, and context?...

How is the problem currently solved (if at all)?

Describe existing workarounds or solutions before your project.

What alternatives exist today? Why are they insufficient?...

What is your proposed solution?
Explain how your project solves the problem better than current solutions.

How does your solution work and what makes it better?...

What triggers an on-chain transaction in your project?
Describe the key blockchain interactions in your solution.

e.g. "Each time a user places a bid, a smart contract records the escrow on-chain. Each time a loan is repaid, the collateral is released automatically."

VIDEO & PARTNERSHIPS

2-Minute Pitch Video

https://loom.com/share/... or https://youtube.com/...

Link to your YouTube or Loom video explaining your project idea.

Integration Partners
Select the integration partners your project will use or build on. This helps us match you with the right mentors.
